

Merchant Payment Solutions

Processing transactions reliably and securely is essential to your business. Authorize.Net, a leading payment gateway since 1996, provides solutions you can trust. More than 207,000 merchants depend on us to process their transactions, assist in fraud prevention, and help their businesses grow. Regardless of your business model—e-commerce, retail, mail order/telephone order (MOTO) or mobile—we offer a wide range of services and tools to enhance your business and increase your revenues.

Stable and Reliable

Authorize.Net has processed more than 1 billion transactions. The Authorize.Net Payment Gateway is available 24x7, 365 days a year. Our secure, fully redundant data centers provide continuous connectivity to the Internet, so you are always able to accept payments.

Industry-Leading Security

With Authorize.Net your customers can be confident their data is secure. We protect sensitive customer information by using the highest levels of encryption and security protocols.

- + Authorize.Net uses industry standard 128-bit Secure Sockets Layer (SSL) technology to secure your IP transactions.
- + Authorize.Net is independently validated as compliant with the Payment Card Industry (PCI) Data Security Standard—a strict industry-wide standard designed to protect sensitive information.

Fraud Prevention

Merchants lost an estimated \$3.6 billion in revenues to online fraud in 2007, an increase of 16% over the previous year.* We offer a variety of features to help protect your business from fraud. In fact, other payment gateways charge additional fees for features that we include for free with each payment gateway account.

- + Address Verification Service (AVS) and Card Code Verification (CCV) provide a high level of protection as part of our standard payment gateway features.
- + Our Fraud Management Department is dedicated to educating you on how to use security features, as well as helping you detect and prevent suspicious transactions.

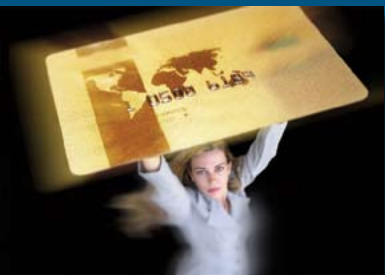

Free Customer Support

We know our payment services are vital to your business operations. That's why we provide free customer support via toll-free phone, e-mail or live chat from 6 AM to 6 PM Pacific time, Monday through Friday. We also provide a searchable Knowledge Base at www.authorize.net/help as well as extensive documentation and FAQs to help keep your business running smoothly.

An Authorize.Net® Payment Gateway account provides a secure bridge to credit card and electronic check processing networks.

Online Reports and Settings

Manage your payment gateway account through the Authorize.Net Merchant Interface, a password-protected Web site that offers a wide range of features:

- + Monitor and review transactions.
- + Manually submit transactions via the Virtual Terminal and Batch Upload features.
- + Configure account and transaction settings.
- + View account billing statements and reports.
- + Download transaction data for integration with third-party software systems, such as QuickBooks® and KeepMore.net™.
- + Create and manage individual payment gateway user accounts for your employees.

eCheck.Net®

eCheck.Net enables Web and MOTO merchants to accept and process bank account payments directly from Web sites or through the Authorize.Net Virtual Terminal.

eCheck.Net also allows you to convert paper checks received in the mail, a drop-box or at the point of sale, into electronic payments. By accepting electronic checks, you expand the payment options available to new and existing customers, enhancing customer loyalty and potentially increasing revenues. Additional fees apply.

About our Resellers

Authorize.Net's services are sold through an extensive network of reseller partners that offer industry leading payment services. Our resellers can also help establish a merchant account—the bank account required for you to accept credit card payments. To find a reseller, contact us toll-free at 866-437-0476.

Accept Payments...

Authorize.Net's solutions are designed specifically to meet the unique challenges e-commerce merchants face. In addition to processing your Web transactions quickly and securely, we provide value-adding products to help you compete in the e-commerce

marketplace: Fraud Detection Suite™ (FDS), Automated Recurring Billing™ (ARB), eCheck.Net, Customer Information Manager (CIM), and more.

- + Easy Integration – Multiple connection methods make it easy to integrate to the Authorize.Net Payment Gateway from any application.
- + Customization – Use your own secure payment form, or customize the look and feel of the Authorize.Net secure payment form and receipt pages.
- + Shopping Cart Compatibility – Over 80 certified shopping carts include a built-in connection to the payment gateway.
- + Verified Merchant Seal – Displaying our free seal on your Web site is one of the easiest ways to create customer confidence and potentially increase sales.

If your business accepts sales orders via mail, telephone or fax, you can submit transactions manually through the Authorize.Net Payment Gateway. All you need is a computer with an Internet connection. Simply log into the Authorize.Net Merchant

Interface to key information into our Virtual Terminal payment form, or use our Batch Upload tool to process transactions from any file-based business application.

- + Built-in Tools – The Virtual Terminal and Batch Upload tools are included with every Authorize.Net Payment Gateway account.
- + Unlimited Users – A single payment gateway account allows you to create and manage multiple users across your network or call center.
- + Enterprise Integration – The Advanced Integration Method makes it easy to integrate enterprise business tools to the Authorize.Net Payment Gateway.

Anytime, Anywhere

Authorize.Net supports multiple ways to accept retail payments. Our Virtual Point of Sale (VPOS) turns any Internet-connected computer into a point-of-sale (POS) terminal with the addition of an inexpensive MagTek® HID USB swipe card reader. VPOS

is an easy-to-implement and easy-to-use, low-cost solution for merchants of any size.

- + Quick Setup – Our browser-based, hosted solution is enabled via a simple plug-in.
- + Risk Management – Sensitive data is stored in the Authorize.Net PCI-compliant data center, never on your computer.
- + Secure – Unlike other solutions, VPOS maintains a locked connection between your card reader and browser.

In addition to VPOS, you can choose from dozens of turnkey, third party POS systems and payment kiosks in our Certified Solutions Directory at www.authorize.net/csdir.

Mobile POS solutions enable merchants to accept credit card payments where it is most convenient for their customers—in the aisle, outside the store or any place you take your business. Merchants with mobile sales teams or

non-traditional storefronts can expand their business and increase revenue by accepting payments from customers anytime, anywhere.

- + Customer Satisfaction – Improve your customers' experiences by speeding up the checkout process.
- + Flexibility – With mobile payments, your storefront literally goes anywhere you do.
- + Increase Sales – Provide customers with a convenient, on-the-spot payment option, increasing sales opportunities.

Find a mobile payments solution in our Certified Solutions Directory at www.authorize.net/mobiledir.

Value-Adding Products

Authorize.Net provides additional merchant solutions to help your business grow. You can purchase any of the following value-adding products to enhance your Authorize.Net Payment Gateway account.

Automated Recurring Billing™ (ARB)

ARB is a convenient and powerful tool for managing recurring transactions such as subscriptions or installment payments. E-commerce and MOTO merchants can take advantage of ARB's flexible features to enhance customer service and build customer loyalty, while reducing authorization declines and overall administrative costs.

Fraud Detection Suite™ (FDS)

FDS is a customizable, rules-based fraud detection system that provides e-commerce merchants with powerful filters and tools to identify, manage, and prevent suspicious and potentially costly fraudulent transactions. You have the ability to customize FDS filters and tools to match your business needs and control how suspicious transactions are handled, including accept, decline, and hold for manual review.

Customer Information Manager (CIM)

You can store sensitive payment data on our secure servers via the CIM API, potentially simplifying your compliance with the Payment Card Industry (PCI) Data Security Standard. CIM also simplifies payments for returning customers and recurring transactions.

Third-Party Solutions

Accept Payments Quickly

Authorize.Net has certified dozens of partners against strict technical standards.

- + Certified solutions include shopping carts, auction integration tools, POS systems, kiosks, and mobile payment devices.
- + Certified developers that provide custom integrations.
- + Certified hosting partners to host your Web site.
